## ENERGY AND ENVIRONMENT

### KLIMA CLIMATE CHANGE CENTER

#### BACKGROUND

klima Climate Change Center shares in the global effort of protecting the global climate by providing the Philippines and East Asia with information and capacity to act decisively on climate change.

By covering the focal themes of climate science and impacts, adaptation, mitigation, and climate policy, klima aims to:

- ✓ Raise public awareness, conduct relevant research, and serve as a clearinghouse of climate-critical information, and
- ✓ Train people and institutions through activities that stimulate hands-on learning on climate change issues.
- ✓ Be guided by service, stewardship, and excellence in all its endeavors.

Established in 1999 under the Climate Studies Division of the Manila Observatory at the Ateneo de Manila University, klima, formerly known as the Climate Change Information Center, is a joint venture of the Inter-Agency Committee on Climate Change (IACCC), the Department of Environment and Natural Resources (DENR), and the Department of Energy (DOE) under the Philippine Climate Change Mitigation Program with funding assistance from the United States Agency for International Development.

#### DEVCAP PROJECT

**Developing Local, National and Regional Capacities to Sustain Climate Change Initiatives in the Philippines and East Asia. (DEVCAP)**

A USAID-supported project that conducts public awareness activities, briefings and training courses that aim to develop the national and regional capacities of government, civil society, and the private sector to actively participate in the global effort to address climate change.

#### LOW CARBON DIET FOR A HEALTHY CLIMATE CAMPAIGN

**There's a new diet in town! And it's not at all about food.**

**Let's be on the  
LOW CARBON DIET  
for a HEALTHY CLIMATE.**

klima's new and hip campaign on CARBON dioxide emissions reduction that appeals on a personal level. Offers concrete and very practical tips on how to reduce CARBON emissions mainly through conservation and efficient use of energy and other resources. Learn how simple changes in your lifestyle can help save the global climate.

#### CLEAN TRANSPORT HUB

The first web-based information service dedicated to the promotion of clean transport technologies and practices in the Philippines.

An open facility that supports clean transport efforts by gathering multi-sectors and enabling them to contribute and obtain information on technology/policy solutions, institutional and product directories, news/features, and other technical resources.
